# Size Structure II

Derek H. Ogle, Northland College 4-Mar-2015

#### **Preliminaries**

```
> # clears objects in R workspace
> rm(list = ls())
> # load needed packages
> library(fishWiDNR) # for setDBClasses()
> library(FSA)
                       # for expandCounts(), Summarize(), hist()
> library(magrittr)
                       # for %<>%
                       # for %>%, filter(), select(), mutate(), group_by(), summarize()
> library(dplyr)
> # options(dplyr.print_max=1e9)
> library(lubridate)
                       # for month()
> # load FM data, expand lengths, add variables, select pertintent variables
> setwd("C:/aaaWork/Web/fishR/Courses/WiDNR_Statewide_2015/Day1_IntroR_FMData")
> d <- read.csv("SAWYER_fish_raw_data_012915.csv",stringsAsFactors=FALSE,na.strings=c("-","NA","")) %>%
       setDBClasses(type="RDNR") %>%
       expandCounts(~Number.of.Fish,~Length.or.Lower.Length.IN+Length.Upper.IN,new.name="Len") %>%
       mutate(Mon=month(Survey.Begin.Date,label=TRUE),Species1=capFirst(Species)) %>%
       select(Species, Species1, Waterbody.Name, Survey.Year, Mon, Gear, Len)
> # create some subsets for use below.
> Spr <- filterD(d,Survey.Year==2013,Mon %in% c("Apr","May","Jun"))</pre>
> BGSpr <- filterD(Spr,Species=="BLUEGILL")</pre>
> BGSprLC <- filterD(BGSpr, Waterbody. Name=="LAKE CHETAC", Gear=="BOOM SHOCKER")
> SprLC <- filterD(Spr, Waterbody. Name == "LAKE CHETAC")
```

## Critical Thinking Interlude

- What variables should be in Spr, BGSpr, BGSprLC, and SprLC.
- What individuals should be in Spr, BGSpr, BGSprLC, and SprLC.

### PSDs Single Waterbody and Species

```
> ( brks <- psdVal("Bluegill",units="in",addLens=7) )</pre>

# **Application Assignment**

Create a script that performs the following tasks:

- 1. Load and prepare your FM data in R (**HINT:** use all or some of your scripts from previous application assignments).
- 2. Compute the PSDs for one species in one waterbody in one year.
- 3. Compute the PSDs for one species in all waterbodies in one year in your FM data.
- 4. Compute the PSDs for all species in one waterbody in one year in your FM data.
- 5. (Time Permitting) Repeat any of the above for another year.

Save your script!
